EXPERIENCE

Engineer

NBCUniversal

📅 01/2023 - Present 📍 CDMX, Mexico

- Proficient in designing and implementing network updates, researching technological solutions, and establishing best practices, including the development of web apps for real-time SRT stream monitoring
- Skilled in project management, managing technical budgets, and coordinating with vendors and support activities, with experience in creating a hub for controlling all IP devices for broadcast shows.
- Experienced in designing efficient infrastructure solutions, resolving operational issues, and developing platforms to enhance team performance and obtain KPIs
- Demonstrated ability to collaborate with internal teams and maintain equipment inventory.
- Strong communication skills and ability to create comprehensive user manuals

Lead Software Engineer

Kaminoitech

📅 05/2021 - 12/2022 📍 CDMX, Mexico

- Translate UI designs into a seamless React application
- Develop comprehensive unit and integration tests for backend and frontend systems
- Efficiently debug and resolve software issues
- Design intuitive user interfaces using Adobe XD
- Collaborate on creating and optimizing endpoints in Django
- Actively participate in scrum methodology to ensure agile project management
- Investigate and integrate cutting-edge technologies and frameworks

Intern Engineer

NBCUniversal

📅 08/2019 - 04/2021 📍 CDMX, Mexico

- Create detailed and precise rack plans using Visio
- Translate documents from English to Spanish with high accuracy
- Maintain and service broadcast equipment to ensure optimal performance
- Provide expert technical support for broadcast productions
- Continue advancing the development of a data management app
- Develop a comprehensive Power BI dashboard to monitor and enhance team performance

Intern

Talent Universidad Panamericana

📅 01/2018 - 12/2023 📍 CDMX, Mexico

- Develop and maintain the webpage using Angular for optimal performance and user experience
- Produce high-quality multimedia products utilizing the Adobe Creative Suite
- Design engaging and interactive materials for educational projects
- Create visually appealing digital designs for online courses
- Serve as a Leadership Intern, showcasing strong leadership and project management skills

EDUCATION

Specialization in Engineering and Project Management

At Universidad Panamericana

📅 01/2023 - 12/2023 📍 CDMX, Mexico

Bachelor in Information Technologies and Intelligent Systems

At Universidad Panamericana

📅 01/2017 - 12/2022 📍 CDMX, Mexico

SUMMARY

Enthusiastic and adaptable Information Technology and Intelligent Systems Engineer with 5 years of experience in software engineering and project management, specializing in front-end development with React and back-end integration using Django. Passionate about innovation, I've demonstrated this through developing a comprehensive platform at NBCUniversal to enhance team performance. Proficient in Agile methodologies, network updates, and software development, I bring a strong ability to translate UI designs into seamless applications. Highly committed and responsible, I foster positive and collaborative environments with exceptional teamwork skills, consistently taking the initiative and pursuing continuous professional and personal growth. Eager to leverage my skills in a Full Stack Engineer role, I aim to contribute to designing, implementing, and maintaining cutting-edge web applications that empower consumers to achieve their goals, thriving in dynamic environments where innovation and teamwork are key.
